## EFFECTS PROJECTION

WEEKLY HIRE  
£

**OPTICAL MOVING EFFECTS** for Patt 252, Cadenza, Toccatà or Starlette projectors.

The VSFX and WaveFX is available for sale, as well as for hire. (See page S1 in the Sales section for details). It offers the complete range of speed and can be remotely controlled by + or - 10V.

VSFX Optical Effects	40.00
VSFX DMX Optical Effects	60.00
WaveFX Optical Effect	40.00

The WaveFX gives the ability to distort a 3<sup>1</sup>/<sub>4</sub>" slide to create the impression of movement. Traditionally used to create the effect of moving waves and water, it can also be used to make a flag flutter in the breeze.

Please contact us to discuss your particular requirements, arrange a demonstration or quotation.

NB These effects, in common with all motorised units, should not be run from a dimmer. The motor should be connected to a 240V independent supply and must be running before the lamp is powered up to avoid damage to the glass. This damage may be charged for.

## TRUSSES & MOTORS

White Light own a large amount of 'professional' rigging equipment as well as the more traditional scaffolding type rigging. Because of the increased liabilities associated with some of this equipment it may not always be possible to 'dry hire' the equipment without proof of the necessary liability insurance.

In certain circumstances White Light may be able to supply fully qualified riggers, please call us for details.
